⚙️ Configure

Description

Precondition

Delete cache and cookie files in the browser

Steps to reproduce

1. Open page

🔴 Kids' Accessories | ZALANDO

2. Hit the "Price" button

3. Turn on the "Sale" slider to display discounted items

4. Hit the "Save" button

5. Turn off the "Sale" slider to display discounted items

6. Hit the "Save" button

7. Refresh the page

Actual result

After turning off the "Sale" slider and clicking the "Save" button, only discounted items continue to be displayed, instead of displaying all items from that section. Refreshing the page also does not help

Expected result

All items are displayed according to the selected options and if the user turns off the "Sale" option he should see all items.

Environment

MacOS Ventura 13.2.1

Google Chrom Version (110.0.5481.100)
